

The Touch Vision 2000 is a cost effective way of providing an interactive interface for a wide range of applications:- ordering food in a pub, looking for a book in a library, check in for hotels, clocking in at work, locating a product in a store, ordering from a catalogue, viewing houses in an estate agents, selecting holidays, patient information for hospitals or surgeries..... The **TV2000** provides a 24hr service and doesn't ask for pay rises or holidays!

This low cost, compact but versatile indoor kiosk is designed to be either wall or desktop mounted. It has a choice of 15" or 17" LCD with an optional touch screen. A wider case is available to house peripherals such as printers, card readers and speakers.

The **TV2000's** metal case is rugged enough for high level usage and, although it is small, can still house a standard, small form factor PC in a lockable rear compartment. The case is supplied as standard in a silver finish but is available in any RAL colour. Customized graphics can be added for customer information or branding.

The **Wall Mount TV2000** is **DDA compatible** as it can be mounted at any height and is suitable for wheelchair users. An optional hearing loop is also available for hearing aid users or it may be fitted with speakers for the visually impaired.

The **TV2000** kiosk may be simple but it is effective for a wide range of applications.

- 4 order point
- 4 estate agents
