

SABRE Vision TV4000 is the smart way to implement indoor kiosk projects. A quick and easy, modular approach gives you a hassle free and cost-effective solution.

The **TV4000** kiosk is very attractive yet has a rugged steel and aluminium frame, designed for heavy usage. It is supplied, as standard, in a silver and black finish.

Custom colours and anti-graffiti vinyl wrap graphics make each kiosk unique and user friendly.

This inexpensive option is available for any quantity. The front panel can be removed and new graphics applied if required.

A wide variety of options: keyboards, touch screens, printers, web cam, card readers, wi-fi networking, biometrics, laser printer etc. are available with the **TV4000 series**. This modular approach allows kiosks to be upgraded at a later date.

For ease of maintenance and to reduce costs, standard PCs & peripherals are used whenever possible. A lockable compartment in the rear houses a standard, small form factor PC. Customers' PCs may be fitted free of charge if preferred.

The **TV4000** keyboard is **DDA compatible** for wheel chair access. DDA peripherals such as hearing loops, keyboards are available for the **TV4000** range.
